This template is designed to work with standard business card sheets.

Small quantities can be printed on Micro-Perf Business Card stock using a color ink jet or color laser printer. Larger quantities can be printed by commercial printers. The PDF file was made using "Press Quality" settings to ensure a high resolution file that will drive a commercial printing press and produce a card of high quality.

Some files have each card outlined with a thin line, this allows you to print them on heavy card stock then cut them apart at home, this will save money over buying the Micro-Perf stock.

Print NO Scaling

Print ONE test sheet before doing multiple sheets

Card size: 2.00 inches High by 3.50 inches wide
10 cards per sheet

Margins:

Top: 0.50 inches

Left: 0.75 inches

Right: 0.75 inches
